

**Thunder Toads** features an hour-long, sublimely relaxing soundscape, recorded among the hills of Land Between the Lakes, Kentucky. American toads give dreamlike trills accompanied by a gentle chorus of spring peepers. A thunderstorm approaches, with periodic rumbling thunder and several periods of light rain and wind. Off to one side, water drips softly from a moist ledge. Just lovely!

### **1. Toad Trills & Thunder (61:00)**

An eminently relaxing mix of creature and earth sounds ... american toads trilling, spring peepers softly chirping, distant thunder, light wind, and rain ... add them together and the result is pure magic. 11-12pm, 10 April 2000, Land Between the Lakes, Kentucky. © Lang Elliott.

#### **Notes by Lang Elliott:**

This is without doubt among my most cherished recordings. There are only a few sound sources involved—toads, peepers, thunder, wind and rain—yet their combination produces a powerfully relaxing soundscape, one that sends me straight into dreamland. Recorded at one of my favorite spots in Land Between the Lakes Kentucky, this soundscape evokes magical memories of nights next to a forest wetland, mesmerized by what I hear.

**Playback Volume:** Adjust your sound system so that the toad trills soothe the ear. You will hear fairly loud thunder at times, though always distant, and it should not be disturbing (although there are a couple of modest thunderclaps around 48:20).

#### **Product Details:**

Title: Thunder Toads

Type: Pure Nature Soundscape (stereo/binaural)

Formats: MP3 digital download (256kbps), FLAC digital download, and On-demand Compact Disc

Download File Names: thunder\_toads.zip (115MB); thunder\_toads\_flac.zip (266MB)

Length: 1 track, 61 minutes continuous

Date Published: February 2015

Recordist: Lang Elliott
